THE GREAT WEST LUMBER CO.

The Season's Cut Finished—Big Prospect for Next Year.

In the course of an interview with J. W. Robinson, President and General Manager of the Great West Lumber Co., a few days ago, our reporter obtained some information regarding this Company, which will be of the greatest interest to citizens of Red Deer and readers of the News generally.

The company have had a very successful season and have more than fulfilled all that the most sanguine citizen could have expected of them. The season's cut of logs have been cleaned up and after a little planing and edging the work will be over for a time.

But the company intend to push their business next year far beyond anything dreamed of a few months ago. By the middle of November one hundred men will be employed up the river working tooth and nail getting out timber for next year's cut, and by the first of December it is expected fully two hundred and fifty men will be employed by the Company at this work.

Two large portable saw mills will be taken up the river and will be kept busy cutting during the winter and next spring.

Extensive preparations are being made for the large and commodious new mill which will be built to handle the logs next year. Already the pile drivers are at work on the foundation and early in the spring the mill will be pushed to completion. The Company expect to be able to turn out seventy-five thousand feet of lumber a day of ten hours next season and the mills will be run to their full capacity. It is confidently expected by the company that the cut next year will be between twenty-five and thirty million feet of lumber.

What this will be to Red Deer can be imagined, and the able and efficient business manager, J. W. Robinson, is to be congratulated on the grand showing of his Company this first year and the energy and foresight displayed in his preparations for such a tremendous business next year.

Hospital Meeting.

A meeting of the Hospital Board was held on Monday evening, present, Dr. Gaetz in the chair, Mr. Oulmott, Mr. McKee, E. L. Gaetz, Capt. Cottingham and Mr. Carscallen. It transpired that so much of the ward accommodation is taken up by the staff, that the Hospital is unable to earn what it might do, and in times of demand its usefulness is curtailed. It further appeared, that when Dr. Gaetz was recently in the east, he endeavored to secure financial support from a number of wealthy men, to enable certain structural alterations to be carried out.

He received a number of promises of help towards the work. After full consideration the Board decided to provide increased ward accommodation and cash earning capacity by fitting up the attic for the use of the staff and providing eight rooms therein.

To permit this work being carried out, it was resolved that when the present patients are removed no others be taken in for the time being, while alterations are in course of completion. Four additional earning wards will be rendered available. It was decided to construct a septic tank for sewerage and lay a drain to same.

Married.

Fream-Geary.—On Wednesday Oct. 31st, 1906, by the Rev. H. W. Sykes, at the residence of the bride's parents, Helen Geary, only daughter of Mr. and Mrs. Geo. Geary, to Edward Fream, both of Innisfail.

\$5.50 & 6.00

W. E. LORD

Wise Buyers

think not of what they pay, but of what they get for what they pay.

Experience has taught them that, dollar for dollar, the National Steel Range is the best investment; that they can't get the same "Range Value" elsewhere, for less money, for the same money, or for any money. Therefore, the wise buyers buy the National, and the wisdom of the wise buyers spreads constantly to other buyers, who likewise become wise by experience. No wonder that the National Steel Range holds the market—that it maintains its undisputed leadership over every other Steel Range.

Prices, \$38.00, 45.00, 50.00 & 59.00.

F. H. TALLMAN.

As for Jewelry, Silverware, etc., we have a stock that pleases peculiar people—the critical kind of folks. Styles correct, prices tempting, attention courteous to all. What more can we say? Let us hear your opinion.

Those Sewer Pipes.

A fair and impartial discussion of our sewerage system can do no harm. The Council should court such discussion, and the citizens are entitled to know all there is to be known on the subject. The claim made by our contemporary, that the pipes are too small, has not been supported by facts or figures. Nothing of a tangible nature has been brought forward to prove this contention but generalities. The statement has been made that the very best available engineers should be consulted on the subject. That is just what the authorities have done. They consulted John Gaetz, probably the highest authority in Canada today on water and sewerage systems, and a contract was made with him, and is on file in the Town Clerk's office, whereby he agreed to act as consulting engineer in chief of the sewerage works. He further agreed "to give the town full particulars of levels, etc., and to start the problem and a suitable system for the complete and satisfactory solution of the drainage of the town on a permanent basis." He was engaged and drew up plans and specifications and started the work, but, owing to illness, was unable to go on, and the contract was given to Thorold & Paradis, members of the Municipal Engineering and Contracting Co., of Calgary, who have the work in hand, and are known in every leading centre in the West as men of ability and who have undertaken some of the most difficult engineering contracts in Calgary and elsewhere, they merely carrying out, we understand, Mr. Gaetz's plans and specifications as to size of pipes and other matters.

The sewer pipes have a capacity of 2,300,000 gallons per day, while the waterworks system has a capacity of only 1,000,000 gallons per day. This, it is claimed, is sufficient for a city of over 30,000 inhabitants. The claim that a small pipe will choke up is met by the counter-claim that a too large pipe is more apt to choke up than a moderately small one, owing to the fact that the small amount of water going through the big pipe would run over and around obstructions until too heavy to move. The force behind the obstruction in the smaller pipe would carry it through before it became congested. With regard to grease, etc., from hotels, grease traps would have to be put in.

Our sewerage system is, without doubt, the most complete of any town of our population in the West, and we doubt if there is a better in any town of 2,000 inhabitants in the Dominion.

PARKVALE LOTS ALL SOLD

All lots snapped up at \$100—Now for Sale at \$125 to 200

For a limited time, however, we have a dozen of those 200 ft. ones listed again at \$115 on easy terms. Excellent, high, level lots only a few blocks from the P.O. Number of good houses to be built on this street next spring. They will be worth \$150 to 200 in six months. Take a "Tip" this time and secure a few of these lots while they are still cheap.

TUESDAY, NOVEMBER 6th, 1906.

LIBELLING CANADA.

Mr. T. H. Race, the Joint Commissioner at the New Zealand International Exhibition for the Dominion of Canada has been interviewed by the newspapers there and has been making some very disparaging remarks about Canada and especially the north western provinces. In reply to a question whether it would be possible to have a reciprocal treaty with Canada, Mr. Race said:-

"I do not see any reason why it should not. Take, for instance, your wool. We want the fine wool to combine with our coarse wool. We have quite a number of hosiery factories at work in the Dominion. Indeed in hosiery we have quite knocked out the Americans. Instead of sending your wool to England in its natural state you could send it to us in yarn. As it is now, it goes to England and we have to buy it in yarn from there. Then another great point of trade would be in your frozen mutton. The Northwest is advancing by leaps and bounds. Last year over 600,000 people came in from America to the Northwest; besides which we have a very large number of people coming in from the Old Land. We advertise our country widely in England, and we offer every inducement to the people to settle on our lands. Now the Northwest only produces in quantity beef and pigs; the mutton is coarse and small in quantity. You have some of the finest mutton in the world, and there is nothing to prevent your sending it to us in large quantities. We would meet with little or no competition from the Dominion, because the cost of sending the sheep by train is too great. There would be a great demand for it, and you would not be sending it further than you do now."

Then a little further on he says: "I was greatly impressed with the beautiful dairy country we passed through on the train from New Plymouth to Wellington. We have some good country in Canada, but this was far better. No wonder you can turn out such excellent butter! I was sent by my Government in charge of an exhibit at the Liverpool Exhibition, and when we got there we set out our sample of butter, which we thought were first-rate. On taking a walk through the Exhibition, however I came across the New Zealand exhibit. I went back to my staff and said, 'It's no use, boys, we shall have to take off our hats to the New Zealand butter.'" And our exhibit was seen no more.

According to our Commissioner we can only produce in quantities beef and pigs, we cannot produce mutton to any extent, and what we do produce is coarse, our butter is inferior, and even our land is not equal to that of New Zealand. We think it of now time Mr. T. A. Race was recalled.

EDITORIAL NOTES.

The first vote in committee of the House of Lords on the educational bill was taken Oct. 29th, and resulted in the defeat of the government by a majority of 200 the vote stood 258 to 58. The result has caused considerable excitement in Great Britain.

The organization by Dalton McCarthy, formerly a Conservative of a third party in Ontario, was one of the prime causes leading to the defeat of the Tupper Government in 1896. Mr. Bourassa, the Nationalist, who is forming a third party in Quebec may do for Sir Wilfrid Laurier in 1907, what the Equal Righter did for Sir Charles Tupper in 1896. -The Weekly Sun.

At a large and representative convention held in the city hall, Calgary, on Thursday evening last W. L. Walsh, a prominent lawyer of Calgary was chosen to contest the constituency of Glenora in the interests of the Conservative party. Mr. Walsh is president of the Conservative

Association of all Alberta and is one of the best known legal men in the province. The meeting was most enthusiastic and everything points to his election by a large majority.

The orchestra of the O'Connor reception in Massey Hall on Saturday night, says the Telegram, inadvertently played "God save the King" as the audience were dispersing. The musicians fiddled in good faith they had heard protestations of respect for the Union Jack and affection for the British empire mingled with tributes to the greatness of Ireland's past and hops for the brightness of Ireland's future.

Accordingly the orchestra played God save the King. There upon hisses came from the lips of indignant patriots and voices were heard in condemnation of the leader of the orchestra for daring to insult a true home rule assemblage with strains of Saxon melody.

These hisses were more impressive of the real sentiment that underlies the home rule movement than all the fine speeches that proceeded the hisses.

Mounted Police Discard Ross Rifles.

The Regina Standard of Oct. 27, says:-

It is learned on reliable authority that the Mounted Police department is to discard the Ross rifle, which was recently purchased, and already large numbers of members of the force have gone back to the use of the Lee-Enfield. Thereby hangs a tale of large purchases of arms for the force, which have now been adjudged to be of no use whatever and ready for the scrap heap.

The firearm known as the Ross rifle was purchased a couple of years ago, after what was believed to be a thorough test of the whole of the R. N. W. M. Police force was re-armed with the gun. After a couple of years use, the firearm has been tried and found wanting, and it is back to the old gun for the policeman.

The rifle has been given the severest test of hard use for it is the R. N. W. M. P., that a gun gets its use, and the men who have judged the rifle to be N. G. are men who have every reason to know what they are talking about.

Although the officers of the force have known for some time that the rifle is almost worthless, it is only lately that they have definitely decided that the gun could not be used longer. The decision was reached as the result of an accident while at target practice. One of the constables was firing at the rifle targets with the Ross rifle, and the branch took blow out. Pieces of the metal struck the policeman in the face and it is the hospital for him for awhile.

The expenditures on these rifles amounted to several thousand dollars and it will doubtless all prove mispent money. The guns cannot longer be used by a military force, and the Dominion Government will hardly feel justified in giving them out to rifle clubs in view of the danger to accident by explosion, as was the case with the one in the hands of the policeman.

Ontario Bank May Pay Fifty Cents On Dollar.

Toronto, Oct. 30.-It is announced from an official source that the assets on the Ontario Bank in sight will be sufficient to yield to the shareholder twenty five cents on the dollar and there is just a possibility that this may be ultimately increased to fifty cents. This, of course, is placed on the par value of \$100. The curator is not making any advance statement, having learned from former experiences that in realizing on such amounts, assets have an unfortunate habit of dwindling. It is pointed out by the directors that the Ontario Bank has considerable real estate which has not been included in the agreement with the Bank of Montreal and which will realize a goodly sum for the shareholders.

LARGE SIZE BOTTLE FERROL Absolutely FREE!

A Daring Distribution

The undersigned Druggist at the earnest solicitation of the Ferrol Co., Limited, of Toronto, has made a thorough and searching investigation into the merits of FERROL, and of the methods of that Company, and he finds that: Every cure claimed by the Company is absolutely genuine; that FERROL is manufactured from the best quality of Mum's Celebrated Cod Liver Oil (the whole of the oil) and is richer in oil than any other emulsion, and while it contains just the right quantity of the best form of Iron and Phosphorus, it is so scientifically prepared, that not one in a thousand finds any trouble in taking it; that the medicine has accomplished the most amazing results in its own city; that its sales in the Home City have been phenomenal; that it is endorsed by all druggists without hesitation or qualification; that it is, in short, all the Company claims for FERROL, and more.

The more I investigated the more enthusiastic I became. It is no longer a question of my willingness to handle the preparation—FERROL—but how can I bring it to the immediate suffering of this city?

It is a heavy responsibility, but I have faith in the honesty and fairness of the Ferrol Company, Limited, of Toronto, and the unequalled merits of their preparation, FERROL.

(Signed) R. H. BROWN.

I find also that the druggists in other cities have taken upon themselves the solemn responsibility of standing behind this medicine; and that these druggists have made in each city a daring and remarkable distribution of full-sized bottles.

Impressed by the action of our fellow-druggists, and convinced that they would not have given this remedy such unqualified approval without positive knowledge of its merits, I have decided to follow their example and distribute free of charge

100 Large Bottles of FERROL Free to the Sick.

THURSDAY, NOVEMBER 8th.

BROWN'S RED CROSS PHARMACY, RED DEER ALBERTA.

Maintaining a first-class Drug Store, the above named Druggist occupies a commanding position in the retail drug trade of this city, and almost every remedy that is offered to the public seeks an outlet through his store. But with an eye single to the interests of his many patrons he is careful to handle the most reliable preparations. Consequently when a medicine is recommended and endorsed by this Druggist, that medicine must have merit.

The above Druggist, after a rigid investigation, described elsewhere in this announcement, has decided to make, upon his own responsibility, the most remarkable distribution of medicine ever attempted in this city. Convinced by personal experience of the extraordinary merits of

FERROL

He has purchased from the Ferrol Co., Limited, of Toronto, a large number of bottles of this remedy, for free distribution, and he hereby invites every person suffering from any form of blood trouble; any person who is run down, discouraged and in need of a powerful tonic; any person suffering from Coughs, Colds, Bronchitis, Croup and all Bronchial or Lung Trouble, Chronic Rheumatism, Neuralgia, Insomnia, Loss of Weight and all wasting diseases; any person who has sought relief in any other remedy or Cod Liver Oil preparation, and failed to find it, cut out the certificate printed herewith, fill out the blank lines, present it at the store on the dates given, and get a bottle of this wonderful preparation, FERROL, Free.

It was necessary for me to purchase a large quantity in order to have the privilege of making this free distribution, and the responsibility assumed by me in this matter. I am positive will be appreciated by the public, and the immense sales that are sure to follow will more than compensate me for the expenditure involved.

There is absolutely no sentiment in this endorsement of FERROL. It is merely a business recognition of a preparation that possesses positive merit, and a keen desire on the part of a progressive concern to always supply the best goods at the lowest possible price.

No other distribution will be made, and it will be necessary for you
to come early in order to be sure of securing a large size
bottle of FERROL ABSOLUTELY FREE

REMEMBER, only ONE bottle will be given to each family. Tell your friends of this Wonderful
Offer for fear they will not see this advertisement.

FERROL WHAT IT IS AND WHY YOU SHOULD TAKE IT

THE FERROL CO., LIMITED
OTTAWA

May 24th, 1908

SIR,

The bottle of FERROL I secured from you, I have found to do great good. My son used it for a bad cold, and it cured him. I know it to be an excellent remedy for a bad cold and for building a person up after sickness. I might say that it was a genuine doctor friend of mine in the city, who used it for his son, and spoke to me of it. I have since recommended it to a great many of my friends to try.

Yours truly,
J. B. TERRY
N. R. 407.

WHAT FERROL DOES.—A careful person of the foregoing will readily suggest to him the value of FERROL. It is a powerful tonic, and it builds up the constitution as no other preparation can. It is a blood purifier, and it cleanses the system of all impurities. It is a lung tonic, and it cures all forms of lung trouble. It is a cough remedy, and it cures all forms of cough. It is a general tonic, and it builds up the system of all weakness. It is a powerful tonic, and it builds up the constitution as no other preparation can. It is a blood purifier, and it cleanses the system of all impurities. It is a lung tonic, and it cures all forms of lung trouble. It is a cough remedy, and it cures all forms of cough. It is a general tonic, and it builds up the system of all weakness.

strength and the system is rendered peculiarly susceptible to the lack of blood. It is a powerful tonic, and it builds up the constitution as no other preparation can. It is a blood purifier, and it cleanses the system of all impurities. It is a lung tonic, and it cures all forms of lung trouble. It is a cough remedy, and it cures all forms of cough. It is a general tonic, and it builds up the system of all weakness. It is a powerful tonic, and it builds up the constitution as no other preparation can. It is a blood purifier, and it cleanses the system of all impurities. It is a lung tonic, and it cures all forms of lung trouble. It is a cough remedy, and it cures all forms of cough. It is a general tonic, and it builds up the system of all weakness.

benefit of their life-giving properties made manifest. In "FERROL," that hope has at last been realized. It is a powerful tonic, and it builds up the constitution as no other preparation can. It is a blood purifier, and it cleanses the system of all impurities. It is a lung tonic, and it cures all forms of lung trouble. It is a cough remedy, and it cures all forms of cough. It is a general tonic, and it builds up the system of all weakness. It is a powerful tonic, and it builds up the constitution as no other preparation can. It is a blood purifier, and it cleanses the system of all impurities. It is a lung tonic, and it cures all forms of lung trouble. It is a cough remedy, and it cures all forms of cough. It is a general tonic, and it builds up the system of all weakness.

Local and General

Tollman leads in Ranges.
Bill & Horn have just unloaded a car of choice Ontario apples.

The first snow storm of the season took place Thursday last, Nov. 1st, and things looked as if winter was a time.

The Ladies Guild of St. Luke's Church will hold a bazaar the last week in November for which great preparations are being made.

Jas. Speakman, Esq., J. P. of Wavy Lake, gave us a friendly call last Tuesday. Mr. Speakman was on his way to attend a meeting of license commissioners at Wetaskiwin.

Go to Tallman for your hardware.

A large number of Parkvale lots were sold during the last week by Michener Carscallen & Co.

Mr. Fitzpatrick, bought the Page property on Douglas street from Michener Carscallen & Co.

Messrs Clark and Capstick bought the Brooks property on Eccles St., from Michener Carscallen & Co.

If you wish a loan on your farm property see The Central Alberta Land Co.

Mr. and Mrs. Geo. Beatty, who have been spending a few weeks in Ontario, are expected home about the middle of the month. They report having had a very pleasant time in the East.

Bishop Pinkham will hold confirmation services at St. Mark's church, Innisfail at 11 a.m., and at St. George's church, Penhold, at 3 p.m., on Sunday, 18th, inst.

E. J. Fream, business manager of the Province, Innisfail, was married on Wednesday last to Miss Helen Grace, daughter of G. Geary, Esq., of Innisfail. We extend our warmest congratulations to the happy couple, and wish him and his fair consort a long and happy wedded life.

The Palmater Sisters Orchestra Co. will appear in Red Deer on Nov. 30th. All those who have heard this musical treat will be delighted to hear it again. Wait for it!

Tom Towers was greatly disappointed on Tuesday last, week when he brought in a fine lot of pure bred Plymouth Rock fowls to the Creamery fattening station, to have them refused. They broke loose the day before and could not be caught. If the government wish to make these poultry stations a success they must not be too strict with the farmers.

It pays to raise pure bred chickens. J. J. Richards informs us, that he is receiving orders for his pure bred Orpingtons from all parts of the country some orders coming from far away British Columbia. He has received a number of orders from the country south of Calgary.

A special meeting of the Red Deer Exhibition Association Ltd., was held on Tuesday last, for the purpose of giving the Board of Directors power to borrow money to pay off the indebtedness of the Association. The meeting was very harmonious and the members were all agreed to start at once to prepare for next year's show, which they say they are determined to make a success.

W. S. Bilton, an old and respected citizen, died suddenly in the early hours of Wednesday morning. The cause of death was heart failure. He had lived long in the Kootenai Valley, where several of his children reside, and had only recently moved into Innisfail, to enjoy a well merited rest. Now he, too, has gone to that bourne from which no traveller returns.

COMING—New York's big melo-dramatic success, "Out in Idaho," under the direction of Ed. F. Adams & Co., 127 West, 40th St., New York city, has been secured by Mr. McBride and will be produced with the original cast, with all its effects, under the leadership of the adapter, Mr. H. Webb Chamberlain, at Red Deer Opera House, Nov. 9. "Out in Idaho," is the most successful Western play since the days of Mills. It is an adaptation of all of Bret Harte's famous western stories, and is the quintessence of all of them. It is a melo-drama, true to western life in the early days. The management has gone to extremes in making "Out in Idaho" true to nature. The western atmosphere has been obtained by procuring and using two trained western broncos in the production, together with "Mist," a dog with almost human intelligence; a pup of "Maid of the Mist," the 25,000 hench dog. "Out in Idaho," is a play that always pleases, and is pronounced by both press and public to be the best melo-dramatic attraction on the road this season.

Red Deer Iron Works, Morrison Street.

J. W. BROUGHTON,
Engineer, Millwright, Machinist.
ENGINE FITTING AND MACHINE SHOP.

Repairing, Welding and Pipe work of all size and number of kinds by machinery.
Repairs to all kinds of machinery promptly executed. The works are fitted throughout by most modern new machinery driven by 5 hp engine.

EVERY ALBERTA FARMER SHOULD EAT

B. & K. OATS

exclusively. Because they are manufactured in Alta. from Alberta Oats, and are second to none.

The Red Deer Mill and Elevator Co. are our Red Deer Agents.

Just think of it . . .

As the winter season is drawing nigh, many farmers dread having to pump water to their cattle during the long winter months. Just call on Springbett & Bowhey and get a Windmill or Gasoline Engine.

They have a full line, also Wood Saws and Grain Crushers, the Ontario Wind Engine and Pump Co.'s Goods. They will be pleased to have you call and inspect whether you buy or not. Blacksmithing in connection. Prices right and quality guaranteed.

There was such excitement in Four Corners as had not been known in that small settlement for many a day. The quail on the Cornish estate were protected by the game laws from April to September and by Dawson, the gamekeeper, at all times, yet one May morning found Dan O'Connor in the Cornish preserves with a brace of quail at his belt, whereupon Dawson, summoning the sheriff from Windsor Head, had promptly arrested O'Connor and jailed him.

Such a thing had never happened before in the history of Four Corners, and public feeling ran high. A crowd had gathered at the one store the place boasted, and that gathered throng finally melted into open defiance.

"I heard that Dawson had kinder got his eye on a couple more of the boys," hinted old man Peterson.

A rudely looking fellow leaning against the counter looked up with a heavy sigh.

"He'd better mark out the boys don't get their eyes on him first," he growled savagely.

"A few birds more or less ain't put in to make a fuss over nobody," put in a tall, lank fellow behind the store.

"It's got to look for a little shoot-in," mumbled old man Peterson.

The hard faced fellow behind the counter straightened up and moved slowly toward the door. "He might's

"HIT, MISS MOLLY, HIT!" SAID A well look for it; it's comin' to him," he said menacingly as he slouched heavily from the room.

The rough element of Four Corners were used to depending upon their rifles to ek out an existence, meager enough at best, and in the lifetime of old Mr. Cornish, the former owner of the great estate, their depredations had been practically unchecked, but now a new order of things prevailed. Old Mr. Cornish was dead, and the village regarded the son who had succeeded him with suspicion and the gamekeeper with contempt.

"You are making a mistake in appointing him," the doctor's daughter had declared, her brown eyes resting on the tall young man beside her.

"I don't see why," Robert Cornish had returned stubbornly. "Something has to be done to preserve the game. These fellows are a lawless set, shooting in season and out of season, and ruining the preserves. Besides," his voice rose determinedly, "it is my property."

"Yes," she admitted, "and yet they have no little it seems quite fair that they should have no right to it."

"But I'm willing they should do a certain amount of hunting," he protested, "only they must observe the game laws, and they must also realize that it is my property, not theirs."

"Do they know you will allow them a certain amount of game?" Robert Cornish asked him.

"Not yet," Dawson admitted cutting them short until they learn to realize the estate is private property. When they understand shooting is a privilege, and not a right, they will give less trouble."

Molly shook her head doubtfully. "I know them better than you do," she said. "They are lawless and ignorant, but there is more good in them than you believe, and Dawson isn't the man to deal with them. I wish you would talk to them yourself."

There was a brief silence. "I will if you wish," he said impulsively. "It will do it tomorrow."

But on the morrow two unforeseen things happened. Robert Cornish was called suddenly away on an urgent business tour and Dan O'Connor bagged the quail.

It was the evening after the excited discussion at the store that Molly, prompted by an unusual feeling of restlessness, crossed the room to the window and, stepping out on the veranda, wandered down into the moonlit garden. Robert Cornish would be back that night, but of course it was no vague hope of meeting him that brightened her eyes or led her through the gate into the road, made light as day by the full moon overhead.

"Hut, Miss Molly, hut!" said a voice close at her ear.

She started violently as a small, unkempt figure crept through the hedge and stopped short in her path.

"Don't go on, miss," said the boy, with such excitement that she started. "You are waitin' for Dawson below, ain't you? He might do you some harm."

"Waiting? For what? To shoot?" asked the girl breathlessly.

"Yes, miss. The moon has gone to Windsor Bend to meet him, an' when it comes back, they're waitin' for him down in the hollow."

"But it isn't Dawson the moon has gone to meet," said Molly in a horrified whisper. "It is Mr. Cornish."

"I guess it won't make no difference to them, miss, whether it's Dawson or the master himself. They're bent on blood."

The boy darted through the hedge, leaving the girl, who had been waiting in the middle of the road. For a moment she stood as if stunned. Then her mind leaped, riotously to the chance of escape. She ran back to the window and through the cross path, she thought desperately, "I may be in time."

She turned through a broken gap in the hedge, into a field beside the road, and, breaking into a quick run, rushed through the wet grass into the thicket. Over a high bank, a single blackberry bush, whose thorns clutched at her night dress, through another gap, across a wall, whose stones slipped and slid under her feet, on again, lightly, swiftly, through a plowed field, across a ditch, over a marsh where her slipped feet sank deep in the soft, wet mud, still onward, with a passionate thankfulness in her heart as she heard the distant ring of horses' hoofs.

Could she reach him? "Robert! Robert!" she cried desperately.

The sounds came nearer. A light, as if cut away swiftly toward her. "Robert!" she cried again. Then, as a tall young man in the cart pulled up his horses sharply, she sprang and, breathless, leaped the Windsor road.

The excitement had largely been a matter of misunderstanding, and when young Cornish had explained the plan of sharing the game, and, furthermore, had refused to prosecute the ring-leaders of the disturbance, Four Corners was with him to a man.

It is hard to say which of his two next moves—his marriage to Molly or his appointment of Dan O'Connor as the position of gamekeeper—aroused the more admiration.

"Each 'er 'em bein', so to speak, a stroke of genius," mumbled old man Peterson.

The Sea a Good Neighbor to Man. Let us be thankful that we are not to send the sea to school and teach it to think. The sense of restfulness it gives us as we contemplate it makes a good deal, I suspect, from our feeling that here is one powerful and active creature that we have not got to train. It will take care of itself, and we must take care of ourselves and not bother about it. It will never want to vote, never blame us for misdeeds, never shame us with evil deeds, never neglect and neglect. Restless as it is, turbulent and untamable, it is a comfortable neighbor, as neighbors go. Really, it is the only one that takes care of itself. The mountains have forest fires and need land and game laws, the very air may be polluted with smoke and dust, the catfishes are water power and can be stolen, the forests are merchandise, the plains are real estate, but the sea is not property, not permanent, not dependable. It is the one thing that balks greed and laughs at abuse—the one thing whereof there is enough to go around, and in which no subordinate effort need be feared to claim a monopoly.—E. S. Martin in Harper's Magazine.

DE KOL WITKOP WAYNE 23, 58,700. She is the dam of Witkop de Kol Korna, a fine young bull, born on the 21st of June, 1905, and now at the head of the noted herd owned by F. W. Ames of New York state.—Country Gentleman.

From the Farm. Holsteins are most popular here, says an Ontario county (N. Y.) farmer. A full blooded registered bull heads the herd, which is tested occasionally. Record for 1905 was 4 per cent butter fat. The dam of my bull gave 61 pounds daily and made 18 pounds 2 ounces in seven days. Milk goes to creamery which makes about 100 lbs. daily. Skim milk is returned free—about 80 pounds for each 100 whole milk. Many farmers use separators at home and carry the cream to the creamery. My daily feed is 80 pounds corn silage, 7 mixed grains, 20 clover hay. I feed about 35 pounds mixed feed for each cow. I buy all my feed in June while prices are low. Fresh cows cost \$40 to \$60.

Expensive Economy. The question as to the best amount of grain to feed a cow has been in review at the Vermont experiment station for four years, and the conclusion reached, broadly stated, is the more grain the better. The total cost of the grain averaged 10 per cent when the four pound ration replaced the two pound feed and about 18 per cent when the six pound ration replaced the four pound ration. It also appeared that a slight lowering of the quality of the milk if not caused by at least a small amount of grain.

It seems fair to conclude that in these trials the restriction of the grain ration to two pounds was made at the expense of the animals' well being and of the owner's pocketbook.

Cleaning the Cow. To clean the cow carefully is as good for her general physical well being as for the protection and purity of the milk. The card or the currier, though not so gently applied will remove all coarse dirt, straw or other matter clinging to the skin, and the cow, eventually, and its way into the pail. Aside from carefully cleaning the cow with the card or currier, the parts under the udder should be wiped with a damp cloth. This has best be done just before the milking begins, as it keeps the udder clean and prevents dampen that which is not removed so that it will not fall into the milk pail.

Get Out the Tally Sheets. It behooves the man who sets out to buy well bred stock to get behind the statement of the owner and see what the record is. No record, no sale. It is not enough for a man to tell us that this or that bull is from registered stock. We must insist that he get out the tally sheets and figure up the actual doings of the father and mother of the animal we propose to buy. It is what counts, and there is not much else that does count, so far as the dairyman is concerned.—Ohio Farmer.

Any Old Thing Won't Do. There are three things which the winning dairyman must be—progressive, responsive and persistent. The man who starts out with antiquated methods, any old stock and a haphazard way of doing things, has just about as good a chance of winning in the race as a draft horse has competing with a pacer, says Kimball's Dairy Farmer.

Use to date methods, carefully bred stock and systematic handling are essential to dairy profit.

Vaseline on Shoes. When shoes have become stiff and uncomfortable from constant wear in the cold, from being by worn, apply a coat of vaseline, rubbing it well into a cloth, and in a short time the leather will become soft and pliable.

No Siren. Mr. City Boarder was being entertained by the city siren. "Do you play and sing 'When the Cows Are in the Corn,' Miss Milky?"

"Lord bless you, no!" she ejaculated. "I get the dogs and chase 'em out."

BULB PLANTING.

"Naturalizing" Them in the Grass and Setting in Shrubbery—Depth to Set Bulbs.

Pleasant effects can be produced by naturalizing bulbs in the grass. With making plantations of this kind the main object should be to get as natural as possible. Care should be taken not to plant the bulbs in straight lines, curves or circles. As most of the common flowers are so cheap they ought to be planted in large masses.

Remember, everybody interested, that milk is not of low quality simply because it is not pure. It is pure, but it contains fat content or of high quality simply because it averages high in butter fat content. Milk of the high fat stripe is not, but even a man would hesitate to eat such milk high quality milk. The fattest milk is always of the poorest quality, and it sickens calves and children alike. Milk of the medium or low fat stripe is the best. It is generally milk of high quality, because it is a balanced ration for calves and infants and for all other domestic animals. In milk of medium butter fat content the fat is generally proportioned to and distributed among the other solids in such a way as to make it fit for use. Such milk is of high quality in every sense of the word. The Holstein-Friesian milk is an example of what is properly called high quality milk. Although it is not a pure milk, it is a milk of high quality, and it is a milk of high quality in fat content.—Holstein-Friesian Register.

Notable Young Holsteins Cow. She is the dam of Witkop de Kol Korna, a fine young bull, born on the 21st of June, 1905, and now at the head of the noted herd owned by F. W. Ames of New York state.—Country Gentleman.

Record for 1905 was 4 per cent butter fat. The dam of my bull gave 61 pounds daily and made 18 pounds 2 ounces in seven days. Milk goes to creamery which makes about 100 lbs. daily. Skim milk is returned free—about 80 pounds for each 100 whole milk. Many farmers use separators at home and carry the cream to the creamery. My daily feed is 80 pounds corn silage, 7 mixed grains, 20 clover hay. I feed about 35 pounds mixed feed for each cow. I buy all my feed in June while prices are low. Fresh cows cost \$40 to \$60.

Expensive Economy. The question as to the best amount of grain to feed a cow has been in review at the Vermont experiment station for four years, and the conclusion reached, broadly stated, is the more grain the better. The total cost of the grain averaged 10 per cent when the four pound ration replaced the two pound feed and about 18 per cent when the six pound ration replaced the four pound ration. It also appeared that a slight lowering of the quality of the milk if not caused by at least a small amount of grain.

It seems fair to conclude that in these trials the restriction of the grain ration to two pounds was made at the expense of the animals' well being and of the owner's pocketbook.

Cleaning the Cow. To clean the cow carefully is as good for her general physical well being as for the protection and purity of the milk. The card or the currier, though not so gently applied will remove all coarse dirt, straw or other matter clinging to the skin, and the cow, eventually, and its way into the pail. Aside from carefully cleaning the cow with the card or currier, the parts under the udder should be wiped with a damp cloth. This has best be done just before the milking begins, as it keeps the udder clean and prevents dampen that which is not removed so that it will not fall into the milk pail.

Get Out the Tally Sheets. It behooves the man who sets out to buy well bred stock to get behind the statement of the owner and see what the record is. No record, no sale. It is not enough for a man to tell us that this or that bull is from registered stock. We must insist that he get out the tally sheets and figure up the actual doings of the father and mother of the animal we propose to buy. It is what counts, and there is not much else that does count, so far as the dairyman is concerned.—Ohio Farmer.

Any Old Thing Won't Do. There are three things which the winning dairyman must be—progressive, responsive and persistent. The man who starts out with antiquated methods, any old stock and a haphazard way of doing things, has just about as good a chance of winning in the race as a draft horse has competing with a pacer, says Kimball's Dairy Farmer.

Use to date methods, carefully bred stock and systematic handling are essential to dairy profit.

Vaseline on Shoes. When shoes have become stiff and uncomfortable from constant wear in the cold, from being by worn, apply a coat of vaseline, rubbing it well into a cloth, and in a short time the leather will become soft and pliable.

No Siren. Mr. City Boarder was being entertained by the city siren. "Do you play and sing 'When the Cows Are in the Corn,' Miss Milky?"

"Lord bless you, no!" she ejaculated. "I get the dogs and chase 'em out."

DE KOL WITKOP WAYNE 23, 58,700. She is the dam of Witkop de Kol Korna, a fine young bull, born on the 21st of June, 1905, and now at the head of the noted herd owned by F. W. Ames of New York state.—Country Gentleman.

From the Farm. Holsteins are most popular here, says an Ontario county (N. Y.) farmer. A full blooded registered bull heads the herd, which is tested occasionally. Record for 1905 was 4 per cent butter fat. The dam of my bull gave 61 pounds daily and made 18 pounds 2 ounces in seven days. Milk goes to creamery which makes about 100 lbs. daily. Skim milk is returned free—about 80 pounds for each 100 whole milk. Many farmers use separators at home and carry the cream to the creamery. My daily feed is 80 pounds corn silage, 7 mixed grains, 20 clover hay. I feed about 35 pounds mixed feed for each cow. I buy all my feed in June while prices are low. Fresh cows cost \$40 to \$60.

CUSHING BROS. CO.

LIMITED.

Say, boss, these are good doors! Where do you get them?

Oh! I buy them at Cushing's, over there on Gaetz Ave

Yes, you can be sure on getting a square deal from those fellows.

K. M. BYERS,
MANAGER RED DEER YARD

Local and General

Try F. H. Tallman for a Heat-

The young men of Lacombe have formed a brass band under the leadership of J. C. Mason.

Hallowe'en was celebrated by the boys as usual, but outside of a little fun in pulling off railings, etc., no harm was done.

Capt. Cottingham, who was out east of Stettler with Senator Talbot, for a weeks shooting and exploring has returned.

Are we going to have a curling club in Red Deer this winter? If we are, it is time some steps were taken to organize.

Mr. T. W. Ryan, general agent for Hardy, Allen Ltd., Calgary, dealers in the New Scale Williams piano, is in town looking up business.

Rev. J. P. Rice, of the Industrial School, preached at the Anniversary and Harvest Home services of the Methodist church, Ignisfall, to large congregations.

F. Dodsworth, representative of the Albertan, Calgary, who was in town in the interests of his paper last week, gave us a friendly call.

Rev. Leonard Gaetz, D.D., assisted Rev. Mr. Shephard, at the union Thanksgiving services in the Leduc Methodist church a few days ago.

Try a National Steel Range at Tallmans. Prices moderate. See prices on front page.

"Out in Idaho," the most successful melo-drama of the season has been secured to play at the Red Deer Opera House for the night of Friday, Nov. 9th. "Out in Idaho" is an adaptation of Brette Harte's famous western stories, and is an attraction that has been meeting with the highest praise in all the largest cities of the States and Canada.

Mr. John M. Fagg of Coalbanks called upon us yesterday, he is on his way down to Missouri for a visit to his old home. Mr. Fagg will not return until April and in all probability may induce some of his friends at home to accompany him on his return. The prairie chicken on his section will also enjoy a well earned rest during our friend's absence.

Mr. Frank L. Vickers, Proprietor of the Alberta Billiard Hall last week received the sad news of the death of his father, which occurred on the 11th, of October at The Dene Alesford, England. The deceased gentleman, who was in his 72nd year, was formerly in business in London, but had for the past 25 years lived in retirement at Alesford. For some time past the late Mr. Vickers had suffered from an enlargement of the liver, and despite all that medical skill and nursing could do he succumbed to the complaint. In politics the deceased was a strong Conservative and an ardent supporter of Mr. Chamberlain's fiscal policy. We extend our sympathy to Mr. Frank Vickers and the members of his family in their sad bereavement.

Hot Lunch, awaits those going by train. --English Cafe.

For \$1 the News and Farm and Ranch Review for one year.

C. E. Strickland, formerly of the Bank of Commerce here, but now manager of the Saskatoon Forwarding & Cartage Co., Ltd., was in town over Sunday, looking up his old friends.

M. J. Manning, formerly manager of the Merchants Bank here, has received the appointment of Inspector of the western division of the Bank, and will make Red Deer his headquarters in the future. We extend a hearty welcome to Mr. Manning on his return to Red Deer.

An alarm of fire Hallowe'en caused excitement for a time. A blaze in the millinery establishment of Mrs. St. Clair, Ross Avenue, was quickly extinguished. The origin of the fire is unknown. The stock was badly smoked up. Damage is claimed to the extent, we understand, of \$600.

We are pleased to see that the Hockey Clubs of Olds, Wetaakwin, Lacombe, Stettler, and Red Deer have formed a league to be known as the Central Alberta Hockey League.

Owing to the success which Farview has met with the proprietors have decided to put another subdivision on the market in the near future, which will appear under the name of Woodlands.

The English Cafe Red Deer is under new management. Every thing of the best quality. From Nov. 1st meals will be served at regular hours for 25 cents. Short orders between mealhours served from 6.30 a.m. to 12.30 a.m.

F. A. Sage, Prop.

Lloyd Bannerman is erecting a large building south of the Alford block, which will be leased by M. E. North, as a livery barn and feed stable. J. E. Ewer, the contractor, has the work well under way.

W. J. Botterill was in Calgary the first of the week making arrangements to put in an elevator system for hoisting machinery etc., to the upper flat of his large implement establishment.

The annual meeting of the Red Deer Branch of the British and Foreign Bible Society will be held in the Methodist Church on Monday, Nov. 12th, at 8 p.m. The Rev. A. C. Farrel will preside. The meeting will be addressed by the Rev. F. W. Good-ewe, Rector of Neepawa, who is at present travelling in the interests of the Society. All members of the Red Deer branch, and all others, who may be interested in the spread of the Gospel of Christ are cordially invited to be present.

The Douglas Vaudeville Company, which will appear here on Nov. 10th, presenting a first class bill of refined, and up-to-date vaudeville. Mr. David Douglas, manager of the Dominion Theatre Winnipeg, being at the head of the company should be guaranteed sufficient of the high standard of the entertainment which

W. H. SMILLIE & CO., RED DEER.

can be expected. A glance over the list of artists included in the company, reveals the fact that comedy is the keynote. That imitable team of entertainers, Mr. Frank Stafford and Miss Marie Stone, who made such a big impression in Winnipeg, are announced as the feature act. They will present that charming little sketch entitled "A Hunter's Game," which is not only a pretty piece of acting, but a distinct novelty. In the appearance of Master Claude M. Wilson, the boy soprano, another splendid act comes to the front. This was a feature act on both the Keith and Orpheum circuits last winter. Hershal and his highly trained dogs will also be present. He has an animal act, which appeals especially to ladies and children. Mr. Hershal is assisted by the boneless wonder, a contortionist par excellence. Mr. Hugh McCormick, the famous English Ventriquist is also a member of the company and he and his troupe of seven figures cause no end of laughter, and are themselves well worth the charge of admission.

The Dainty Sisters Bannister, with their specialty songs and dances will more than make good. Their work is clean and clever and their jokes are refined and absolutely free from any undesirable material. The performance will be concluded by the Kinodrome moving pictures entitled "Those terrible kids," and "The Limburger cheese," a pictorial story of a couple of naughty boys and 'tis one of the biggest success ever shown. The prices will be 35c, 50c, 75c, book your seats early at Grieve & Berry's Drug Store. Matinee prices 25c and 50c.

Long Distance Runners

Long distance runners are always good athletes. They require much special training, must be as hard as steel and run with unerring precision.

REGINA WATCHES

Are long distance runners. They are in perfect training, are of hardened steel and run with greatest precision. Some watches may be able to run faster on a sprint, but for steady, reliable, year round performances, the Regina Watches lead the leaders.

We are always pleased to show these watches to prospective buyers and others and explain their good points.

R. A. JACOBSON, Red De

Winter here once more!

BUT

There is one consolation, and that is you know you can secure the best line of Cutters and Sleighs to be obtainable right here in your own town. There is no danger of breaking down with a broken bunk or runner, for our goods are fully guaranteed. We have three makes of sleighs, to choose from, besides 12 different sizes.
